**114 學年度**
**計算機實習 I**

# 計算機實習 I 解答書

# A BOOK YOU SHOULD CONSULT FIRST WHENEVER YOU HAVE ANY QUESTIONS

5 de septiembre de 2025

# 目錄

（一） 作業繳交格式 Assignment Submission Format ..... 2

1.1 ee-class 繳交方式 ee-class Submit Method ..... 2

1.2 程式碼檔名命名 Naming of Program File ..... 2

1.3 註解規定 Comment Guidelines ..... 2

（二） 作業評分標準 Assignment Grading Criteria ..... 3

2.1 繳交格式扣分項目 Deduction Items for Submission Format ..... 3

2.2 程式碼扣分項目 Deduction Items for Program Code ..... 3

2.3 作業期限扣分項目 Deduction Items for Assignment Deadlines ..... 4

（三） Sample Input & Output 理解方式 ..... 5

（四） 程式環境教學 ..... 6

4.1 Python ..... 6

4.1.1 Windows ..... 6

4.1.2 macOS ..... 6

4.2 C++ ..... 7

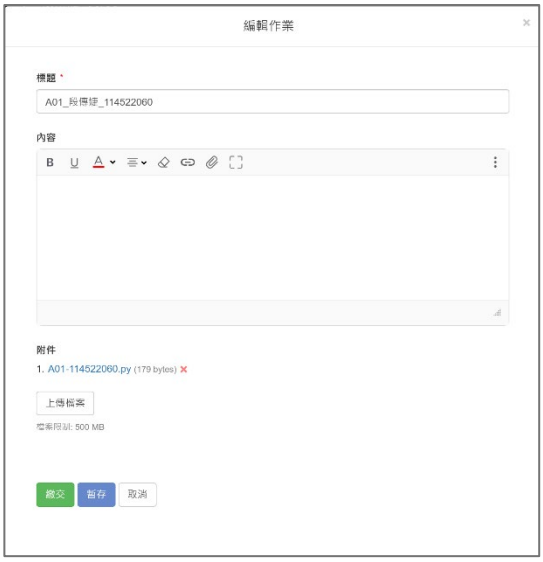
4.2.1 Windows ..... 7

4.2.2 macOS ..... 7

（五） 助教聯絡方式 TA mail ..... 7

# （一） 作業繳交格式 Assignment Submission Format

## 1.1 ee-class 繳交方式 ee-class Submit Method



**標題: [哪個實習班][作業幾]_[姓名]_[學號]**

- 範例: 我是實習 B 班的陳大壯，要繳交作業 10，學號是 114502000，所以標題應該是 B10_陳大壯_114502000

**內容: 不用打任何東西**

**附件: 你的作業檔案**

**Title: [Internship Class] [Assignment Number]_[Name]_[Student ID]**

e.g. I am Chen Da-Zhuang from Internship Class B, submitting Assignment 10. My student ID is 114502000, so the title should be: **B10_Chen Da-Zhuang_114502000**.

**Content:** Nothing needs to be written

**Attachment:** Your assignment file

## 1.2 程式碼檔名命名 Naming of Program File

**[哪個實習班][作業幾]-[學號].副檔名**

**[Internship Class] [Assignment Number]_[Name]**

## 1.3 註解規定 Comment Guidelines

```
'''
Assignment: A01
Name: 段傳婕
學號: 114522060
系級: 資工碩一 / 資工1A / XX系大幾什麼班
'''

a = input()
print(a)
```

Assignment: [哪個實習班][作業幾]

= [Internship Class] [Assignment Number]

Name: Your name

學號: Student ID

系級: 什麼系幾年級哪一班

= Which department, year, and class

***註解規定沒有強制格式，四項資訊都有寫到就不扣分，但 Assignment 寫錯會扣***

***There is no mandatory format for comments. As long as all four pieces of information are included, no points will be deducted. However, if Assignment is written incorrectly, points will be deducted.***

# （二） 作業評分標準 Assignment Grading Criteria

## 2.1 繳交格式扣分項目 Deduction Items for Submission Format

1. 檔名及繳交格式或命名錯誤: -5 Incorrect file name, submission format, or naming: -5
2. Online judge 或 ee-class 任一項缺交: -10 Missing submission on either Online Judge or ee-Class: -10

## 2.2 程式碼扣分項目 Deduction Items for Program Code

1. 開頭註解格式錯誤: -10
   - E.g. Assignment 格式錯誤、四缺一資訊、未於正確位置註解
2. 程式碼中註解不足 or 沒有註解 or 註解亂寫: MAX -20
   - 不是寫多分數就高，要有意義，且表達精簡
   - E.g. 若變數命名不夠直觀可給予註解、程式邏輯曾卡住的地方可以寫你的思路、程式區塊如 function 等用途可給予註解
3. 程式碼抄襲 or 使用 AI/GPT 生成作業解答: 0 分
   - 程式碼提供者同樣 0 分
4. 無意義變數名稱: MAX -5
   - E.g. a, b, c 這種無意義命名，或用中文命名
5. 未通過 Online judge 測資: 分段給分
6. 未按照 Sample input or output 格式輸出: MAX -10

1. Incorrect header comment format: -10
    - E.g. wrong "Assignment" format, missing any one of the four required pieces of information, or comments not placed in the correct location
2. Insufficient comments in code / no comments / meaningless comments: MAX -20
    - Writing more comments does not mean higher scores; they must be meaningful and concise
    - E.g. if variable names are not intuitive, provide comments; if you struggled with logic, note your thought process; for code blocks such as functions, explain their purpose
3. Code plagiarism or use of AI/GPT to generate the assignment solution: 0 points
    - The code provider will also receive 0 points
4. Meaningless variable names: MAX -5
    - E.g. meaningless names like a, b, c, or using Chinese names
5. Failure to pass Online Judge test cases: partial credit will be given
6. Failure to follow Sample Input/Output format: MAX -10

## 2.3 作業期限扣分項目 Deduction Items for Assignment Deadlines

1. 未於繳交期限前上傳: 分數打八折
2. 未於遲交期限前上傳: 0 分，不開放補救

1. Failure to upload before the submission deadline: score will be reduced to 80%
2. Failure to upload before the late submission deadline: 0 points, no make-up allowed

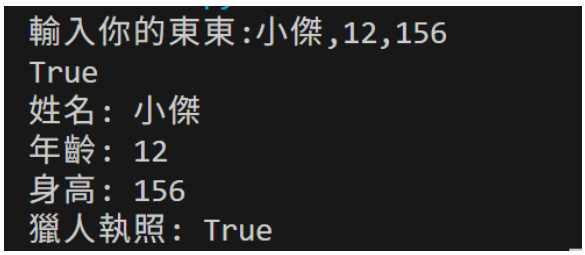
# （三） Sample Input & Output 理解方式

| **Sample Input 1** | **Sample Output 1** |
|---|---|
| 小傑,12,156<br>True | 姓名: 小傑<br>年齡: 12<br>身高: 156<br>獵人執照: True<br>↵ |

以作業 1 為例:

Input: 當你在執行程式碼時，不該有多餘的**提示字串**，下圖為錯誤示範:

Output: 空格、換行、Sample output 長怎樣你的 output 就該長怎樣。很多檢定與比賽如 ICPC、CPE 等較為正式的程式檢驗場合，常常會有這種搞格式的小細節，故作業也會出這種來讓大家培養抓細節的習慣。



Using Assignment 1 as an example:

**Input:** When running your program, there should be no extra **prompt strings**. The figure above shows an incorrect example.

**Output:** Spaces and line breaks—your output must match the Sample Output exactly. Many formal programming evaluations and competitions, such as ICPC and CPE, often emphasize these formatting details. Therefore, assignments will also include such requirements to help you develop the habit of paying close attention to details.

# （四） 程式環境教學

## 4.1 Python

### 4.1.1 Windows

1. Download 最新版本的 Python: 點我

2. 安裝時請勾選 **Add Python to PATH**, 提示字串長不一樣沒差，只要摘要是加入 PATH 就打勾

3. 開啟 cmd (快捷鍵: Win + R 打 cmd)，輸入 python --version，應出現 Python [你安裝的版本]
4. Download Visual Studio Code (VSCode): 點人家
5. 點那個 (Means extension)
6. Download Python 的 extension & Code Runner
7. 在你喜歡的地方建一個資料夾
8. 在 VSCode open 那個 folder
9.

點那個像文件的圖案新增檔案
10. 副檔名請命名.py
11. 你可能覺得每次執行都很不方便，你就自己寫 json 檔設定，就能按快捷鍵執行，去 Google

### 4.1.2 macOS

我覺得他步驟超清楚你們去看這個就好

### 4.2 C++

#### 4.2.1 Windows

等之後上到會教，或你自己 google

#### 4.2.2 macOS

他寫的真好

## （五） 助教聯絡方式 TA mail

**請不要都寄給第一個助教，會導致業務量過大而無法快速回覆**

**Please do not send everything to the first teaching assistant, as this will result in an excessive workload and delays in response.**

當加退選結束後，我們會公告每個助教負責的學生名單，到時候請寄給負責你的助教

After the add/drop period ends, we will announce the list of students assigned to each teaching assistant. At that time, please send your work to the TA responsible for you.

1. 段傳婕: dxxxn@g.ncu.edu.tw
2. 鄭立筠: cly328@g.ncu.edu.tw
3. 賴鈞瑋: 885art@gmail.com
4. 許寯傑: 114527009@cc.ncu.edu.tw
5. 楊絜宇: 114527013@cc.ncu.edu.tw
6. 林威佑: m114522141@g.ncu.edu.tw
7. 蔡定瑋: deanway91@g.ncu.edu.tw
